

Atlassian Cloud Migration Bug Intelligence Dashboard

Production Architecture

Legend: — Active connection

Data Flow:
1. Users access dashboard via Vercel
2. Git push triggers deployment to Vercel & Railway
3. Frontend fetches data from FastAPI backend
4. cron-job.org triggers daily sync (POST /api/bugs/sync/incremental)
5. Backend fetches new/updated bugs from Atlassian Jira
6. Claude Haiku AI triages each bug (category, team, priority)
